

Diagnosis of autoimmune hepatitis

Dr Iraj Shahramian

Professor of Pediatric Gastroenterology and hepatology

Shiraz University of Medical sciences

The background features several thin, curved lines in light gray and white, some solid and some dashed, creating a sense of motion or a stylized globe. A large red speech bubble is positioned on the left side of the slide.

Diagnostic criteria

- **Clinical**
- **Biochemical**
- **Immunological**
- **Histological**
- **Exclusion of other disease**

clinical

- Acute onset
- ALF
- Insidious
- Complications of cirrhosis
- Incidental finding

A large red speech bubble graphic with a white outline, pointing downwards. The word "Exclude" is written in white text inside the bubble.

Exclude

- Hep B
- Hep C
- Willson disease
- NASH
- Drug

Auto antibodies

- ANA 1:20
- ASMA 1:20
- LKM1 1:10
- LC1
- SLA
- pANCA

Pathology

- Interface hepatitis
- Panlobular hepatitis
- Emperipolesis and hepatocyte rosetting
- Hyaline droplets in Kupffer cells

Simplified diagnostic system

- ANA
- ASMA
- LKM
- SLA
- IgG
- Liver histology
- Absence of viral hepatitis
- Definite and Probable
